🌐 bikrantnath22

Results-driven software engineer with expertise in AI/ML, Generative AI, and LLM-powered applications alongside full-stack development, mobile applications, and scalable system design. Proficient in delivering efficient, maintainable, and high-quality code, with strong problem-solving skills and a passion for continuous learning and emerging technologies. Experienced in collaborating across teams to deliver innovative, user-focused solutions, and committed to building impactful software that drives value and enhances user experience.

Skills

Programming Languages: JavaScript, Python, C, C++, C#, HTML, CSS, PHP (basic)

Frameworks: React, React Native, Node.js, Express.js, MongoDB, Tailwind CSS, Firebase

Tools & Platforms: VS Code, Git, GitHub, Postman, Unity

Experience

Software Development Intern | Fineworks Media and Solution Technologies

Jan, 2022 - July, 2022

- Developed a full-stack hotel booking platform with room availability, responsive front-end UI, and secure authentication.
- Implemented backend APIs for booking management, availability checks, and reservation workflows with a database-backed room inventory system.
- Integrated online payment processing to enable secure and seamless booking transactions.

Codestellation (Hackathon) Winner AEC(Assam Engineering College) – Resume Builder Project

2022

Built a resume builder web application that dynamically generated professional resumes from user input.

- Implemented features for template selection, real-time preview, and PDF export.

Projects

Athaana – eCommerce Grocery Website (Startup based in Nalbari, Assam)

2021

- Developed a full-stack eCommerce grocery platform with product listings, cart, and order management.
- Implemented user authentication, checkout system, and order tracking for a smooth customer experience..
- Designed a responsive UI with React, and built backend APIs with Node.js/Express and MongoDB..

Learning-based Cognitive Assessment for Computer Literacy using Virtual Reality

2024

Academic Project – Tripura University (2024)

- Designed a VR-based learning and assessment system for school students, accessible via Meta Quest, with a companion mobile/desktop app for progress tracking and management.
- Developed app modules to track user performance, deliver quizzes, and collect responses, while the VR interface simulated computer hardware learning in 3D.
- Conducted comparative experiments between VR-based and text-based assessments, demonstrating higher engagement and comprehension in VR.
- Proposed a hybrid model combining text for theory and VR for practical simulations, with usability testing and customization for improved learning outcomes.

Animal Rescue Platform

[github repo](#) [🔗](#)

2024

- Built a full-stack Animal Rescue Platform with React.js, Node.js (WebSockets), MongoDB, and Cloudinary.
- Implemented real-time NGO matching & alerts using geolocation to speed up rescues.
- Designed an admin dashboard with case tracking & analytics for efficient NGO management.

Task Management System

[github repo](#) [🔗](#)

2024

- Built a full-stack platform (React.js, Node.js, MongoDB) for companies to create projects with deadlines and assign managers.
- Implemented role-based access for managers to delegate and track employee tasks.
- Added an employee-to-manager messaging system with file attachment support for seamless communication.

Vastramaniaa (Shopify E-commerce Platform)

2024

- Contributed to the design and customization of an online clothing store built on Shopify.
- Worked with Liquid templates to implement product pages, collections, and UI enhancements.

Education

Tezpur University

M.Tech - Computer Science and Engineering - **CGPA – 6.97(till 2nd sem)**

2024 - 2026
Tezpur, Assam

Tripura University

MCA - Master of Computer Application - **CGPA - 7.71**

2022 - 2024
Guwahati, Assam
